Profile

Project engineer, 4 years of experience with AutoCAD, Excel, Word, Photoshop, and
a lot of paperwork.

Started learning HTML, CSS, JavaScript because i want to be a web developer.

I learned HTML, CSS by making a lot of weird websites, using w3schools.

I learned javascript the same way but i also read the book Eloquent JavaScript
written by Marijn Haverbeke and read a lot of stuff on MDN web docs.

I am a calm person, can get along with mostly everyone, and i like to be on time.
